### **Total general education applied to the TU Core Curriculum: 34 credits**

Students will transfer with a Core Package 3, which indicates that they must only complete the Advanced Writing Seminar (Core 9) and Ethical Perspectives (Core 14) requirements at TU. If a student takes an ethics course as an Arts & Humanities general education course, they will be required to complete another Core Curriculum requirement. The Towson Seminar (Core 1) requirement is waived for all incoming transfer students.

**Total program requirements applied to the TU degree: 26 credits**

**Total transferred to TU: 60 credits**

Students may transfer a maximum of 64 credits. If students do not adhere to the courses outlined above, they are not guaranteed completion of the bachelor's degree in 2 years.

## **Section 2: Carroll CC Course Selection Details**

This section explains any specific course selections made in section 1 and provides transfer planning guidance specific to this degree plan. Students must follow the course selections outlined in this document. If students do not complete any or all of the courses outlined in this agreement, they will be required to complete outstanding requirements at TU.

### **COURSE AVAILABILITY**

Certain courses at Carroll CC are only offered in the fall or spring term. Students must be mindful of course availability and plan accordingly to complete a course in fall or spring when it is offered. The Carroll CC catalog provides a recommended sequence of courses for students to follow based on course availability.

### **GENERAL EDUCATION**

The program requirement BIOL 101 is counted toward the total of General Education credits completed at Carroll CC. This enables TU to apply a core package and recognize the completion of the associate's degree's general education requirements without course-by-course placement in the Core Curriculum.

### **PROGRAM ELECTIVE**

For the **program elective**, students must take **BIOL 240 Genetics** to satisfy the MB3 major's requirement for BIOL 309. This will transfer as lower-level credit. See "Lower-Level Credit Equivalents of Upper-Level Courses" for details.

### **LOWER-LEVEL EQUIVALENTS OF UPPER-LEVEL COURSES**

A course number beginning with T indicates that it is a lower-level equivalent of an upper-level TU course. CHEM T31, CHEM T32, and BIOL T09 satisfy major requirements but do not count toward the TU degree requirement for 32 upper-level units.

### **Section 3: Degree Requirements to Be Completed at TU**

This section outlines the requirements students will complete upon transferring into the Bioinformatics concentration. This concentration is designed for students to learn to apply computer science to the study of the molecular basis of life. Refer to section 4 for major-specific recommendations and university-wide degree requirements.
