

American College Health Association National College Health Assessment

## TOWSON UNIVERSITY Executive Summary

## Spring 2022

# American College Health Association National College Health Assessment III 

## ACHA-NCHA III

The ACHA-NCHA III supports the health of the campus community by fulfilling the academic mission, supporting short- and long-term healthy behaviors, and gaining a current profile of health trends within the campus community.

ACHA, the nation's principal advocate and leadership organization for college and university health, represents a diverse membership that provides and supports the delivery of health care and prevention and wellness services for the nation's 20 million college students. For more information about the association's programs and services, visit www.acha.org, and www.acha.org/NCHA.

## Introduction and Notes

The ACHA-National College Health Assessment (ACHA-NCHA) is a national research survey organized by the American College Health Association (ACHA) to assist college health service providers, health educators, counselors, and administrators in collecting data about their students' habits and behaviors on the most prevalent health topics. The ACHA-NCHA now provides the largest known comprehensive data set on the health of college students, providing the college health and higher education fields with a vast spectrum of information on student health.

ACHA initiated the original ACHA-NCHA in 2000 and the instrument was used nationwide through the Spring 2008 data collection period. A revised survey, the ACHA-NCHA-II, was in use from Fall 2008 - Spring 2019 data collection periods. The survey was redesigned again, and data collection with the ACHA-NCHA III began in Fall 2019.

Please note that it is not appropriate to compare trends between versions of the survey. Directly comparing data points between the Original ACHA-NCHA, the ACHA-NCHA II, and the ACHA-NCHA III can lead to an erroneous conclusion and is not recommended.

## Notes about this report:

1. Missing values have been excluded from analysis and only valid percents are included in this document, unless otherwise noted.
2. The ACHA-NCHA III is programmed differently than earlier versions of the survey. Rather than asking the respondents to answer every question (and offering a "not applicable" option), display logic was used throughout the survey to determine whether, based on their response to an earlier question, the student saw a follow-up question. This makes the valid percents of certain questions impossible to apply to the entire sample, as the denominator used was limited to only the number of students that saw the question. When appropriate, results are also presented using the entire sample as the denominator to show the proportion of the overall sample that experienced a particular issue. These differences in presentation are carefully noted throughout the document and will often explain differences observed between this document and the full data report. Please look carefully at descriptions of the data presented in each table, as well as any footnotes included.
3. About the use of sex and gender in this report: Survey results are reported by sex based on the responses to questions $67 \mathrm{~A}, 67 \mathrm{~B}$, and 67 C . The responses to these questions are used to create a new variable called RSEX. RSEX is used for organizing results in the ACHA-NCHA report documents. Respondents are reported as cis men or cis women only when their responses to $67 \mathrm{~A}, 67 \mathrm{~B}$, and 67 C are consistent with one another. If gender identity is consistent with sex at birth AND "no" is selected for transgender, then respondents are designated as either cis men or cis women in RSEX. If respondents select "yes" for transgender OR their sex at birth is not consistent with their gender identity, then they are designated as transgender/gender non-conforming in RSEX. A respondent that selects "intersex" for sex at birth, "no" for transgender, and man or woman for gender identity are designated as cis men or cis women in RSEX. A respondent that selects "intersex" for sex at birth, "yes" for transgender, or selects a gender identity other than man or woman are designated as transgender/gender non-conforming in RSEX. A respondent that selects "another identity" on 67C is designated missing in RSEX. A respondent that skips any of the three questions is designated as missing in RSEX. Totals displayed in this report include missing responses. Please see the ACHA-NCHA III survey codebook for more information about how data on sex and gender are coded.

For additional information about the survey's development, design, and methodology, email Mary T Hoban, PhD, MCHES, (mhoban@acha.org), Christine Kukich, MS (ckukich@acha.org), or visit www.acha-ncha.org.

We need to draw your attention to an important change in your ACHA-NCHA Report documents. Beginning in Spring 2021, responses for transgender and gender-nonconforming students are readily available directly in the report documents. This represents an important change in the way we have been reporting ACHA-NCHA results. We've prepared the following information to better explain the specific changes, our reasoning for doing so, and tips for using these redesigned report documents.

## I. What we've done to date

- The ACHA-NCHA has asked respondents about their gender identity for 12 years.
- Data on transgender and gender-nonconforming (TGNC) students was available in the data file, but not displayed explicitly in the report documents documents in an effort to protect the privacy of TGNC students, particularly those students in smaller campus environments and at schools that publicly shared their ACHA-NCHA report documents.
- We have been trying to find the right balance between protecting students' privacy and making the results accessible to campus surveyors who may not use the statistical software that would be required to extract this information directly from the data files. Until now, we've erred on the side of protecting student privacy.

## II. Why change?

- The number of TGNC students in our samples has been increasing over the years. Between 2008 and 2015, the number of students identifying as TGNC was very small (less than $0.05 \%$ ). We've learned over the years that gender identity is complex and fluid. To better capture this complexity, we began asking separate questions about sex at birth and gender identity in Fall 2015. Now TGNC students tend to represent 3-4\% of the overall sample.
- With greater number of students identifying as TGNC on the ACHA-NCHA in recent years, we have a better opportunity to understand their needs and behaviors than we have in years past.
- A number of health disparities between TGNC students and their cisgender peers have been well documented[1], and schools need readily available access to this data in order to better address the needs of TGNC students.

## III. What's different about the way we are reporting?

- First - a note about how we have been reporting ACHA-NCHA results to date. RSEX is a variable we create based on the responses to the questions on sex at birth, whether or not a student identifies as transgender, and their gender identity. The RSEX variable had allowed us to sort respondents into 4 groups for reporting purposes: male, female, non-binary, and missing. (Details about this variable can be found in all report documents.)
- The value labels for RSEX have been revised to better represent gender identity rather than sex. A value of " 1 " has been changed from "Male" to "Cis Men[2]." A " 2 " has been changed from "Female" to "Cis Women[3]." The value " 3 " has been changed from "non-binary" to "Transgender and Gender-Nonconforming" (TGNC), as it's a more accurate and inclusive term. The value " 4 " on RSEX remains "missing/unknown" and is used for students who do not answer all three questions.
- The "missing/unknown" column in the Data Report document has been replaced with a "Trans/Gender-Nonconforming" column. Because space limitations in the report prevent us from displaying all 4 categories plus a total column in the same document, it's now the "missing/unknown" column that is not displayed. Now when the Total of any given row is higher than the sum of the cis men, cis women, and TGNC respondents, the difference can be attributed to "missing/unknown" respondents that selected the response option presented in that row
- A column for "Trans/Gender-Nonconforming" has been added the Executive Summary Report document.

## IV. Important considerations with this new format

- Percentages in the Executive Summary may represent a very small number of TGNC students and can limit the generalizability of a particular finding. To assist with the interpretation of the percentages displayed in the Executive Summary, the total sample size for each group has been added to every page.
- We encourage ACHA-NCHA surveyors to carefully review their report documents, particularly among the student demographic variables, and consider students who may be inadvertently identified in the results based on a unique combination of the demographic characteristics before sharing the documents widely or publicly. This is especially true for very small schools, as well as schools that lack diversity in the student population.
- Think about the implication of working with and documenting very small samples - from the perspective of making meaningful interpretations, as well as the privacy of respondents. This is true of all demographic variables, and not limited to gender identity. You may consider a minimum cell size or another threshold by which you make decisions about making your Institutional Data Report publicly available. It is less of a concern in your Institutional Executive Summary as we only display the percentages with the overall sample size.
[1] Greathouse M, BrckaLorenz A, Hoban M, Huseman R, Rankin S, Stolzenberg EB. (2018). Queer-spectrum and trans-spectrum student experiences in American higher education: The analysis of national survey findings. New Brunswick, NJ: Tyler Clementi Center, Rutgers University.
[2] Cisgender refers to people whose gender identity matches their sex assigned at birth. Cis men is short for "cisgender men" and is a term used to describe persons who identify as men and were assigned male at birth.
[3] Cis women is short for "cisgender women" and is a term used to describe persons who identify as women and were assigned female at birth.

This Executive Summary highlights results of the ACHA-NCHA III Spring 2022 survey for Towson University consisting of 310 respondents. The response rate was $6.2 \%$.

## Findings

Definitions:
Recommendation for aerobic activity: 150 minutes or more of moderate-intensity physical activity per week or 75 minutes of vigorous-intensity physical activity or the equivalent combination

Recommendation for strength training: 2 or more days a week of moderate or greater intensity activities that involve all major muscle groups

- Active Adults meet the recommendation for strength trainingAND aerobic activity

■ Highly Active Adults meet the recommendation for strength training and TWICE the recommendation for aerobic activity ( 300 minutes or more of moderateintensity physical activity per week or 150 minutes of vigorous-intensity physical activity or the equivalent combination)

|  | Percent (\%) | Cis Men | Cis Women | Trans/ Gender Nonconforming | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Guidelines met for aerobic exercise only |  | 66.7 | 65.8 | 76.9 | 66.2 |
| Guidelines met for Active Adults |  | 51.5 | 40.5 | 30.8 | 42.3 |
| Guidelines met for Highly Active Adults |  | 42.4 | 31.1 | 23.1 | 33.1 |

## Food Security

Based on responses to the US Household Food Security Survey Module: Six-Item Short Form (2012)
from the USDA Economic Research Service.

|  | Percent (\%) |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | Cis Men | Cis Women | Trans/ Gender Nonconforming | Total |
| High or marginal food security (score 0-1) |  | 53.8 | 49.1 | 30.8 | 49.2 |
| Low food security (score 2-4) |  | 26.2 | 19.6 | 46.2 | 22.3 |
| Very low food security (score 5-6) |  | 20.0 | 31.3 | 23.1 | 28.5 |
|  |  |  |  |  |  |
| Any food insecurity (low or very low food security) |  | 46.2 | 50.9 | 69.2 | 50.8 |

## C. Health Care Utilization

*Only students who reported receiving care in the last 12 months were asked these questions

| Cis Men n | $=$ | 66 |
| ---: | ---: | ---: |
| Cis Women $\mathrm{n}=$ | 226 |  |
| Trans/GNC $\mathrm{n}=$ | 13 |  |

| College students reported: | Percent (\%) | Cis Men | Cis Women | Trans/ Gender Nonconforming | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Flu vaccine within the last 12 month |  | 55.4 | 58.8 | 69.2 | 58.3 |
| Not starting the HPV vaccine series |  | 9.2 | 11.1 | 15.4 | 10.7 |
| Starting, but not completing HPV vaccine series |  | 6.2 | 4.9 | 0.0 | 4.9 |
| Completing HPV vaccine series |  | 52.3 | 63.7 | 76.9 | 61.9 |
| Not knowing their HPV vaccine status |  | 32.3 | 20.4 | 7.7 | 22.5 |
| Ever having a GYN visit or exam (females only) |  |  | 51.1 | 46.2 |  |
| Having a dental exam in the last 12 months |  | 77.3 | 69.9 | 100.0 | 72.5 |
| Being tested for HIV within the last 12 months |  | 10.6 | 11.9 | 30.8 | 12.3 |
| Being tested for HIV more than 12 months ago |  | 9.1 | 13.3 | 23.1 | 12.7 |
| Wearing sunscreen usually or always when outdoors |  | 13.6 | 42.0 | 15.4 | 35.1 |
| Spending time outdoors with the intention of tanning at least once in the last 12 months |  | 43.1 | 57.5 | 15.4 | 52.3 |

## D. Impediments to Academic Performance

Respondents are asked in numerous places throughout the survey about issues that might have negatively impacted their academic performance within the last 12 months. This is defined as negatively impacting their performance in a class or delaying progress towards their degree. Both types of negative impacts are represented in the figures below. Please refer to the corresponding Data Report for specific figures on each type of impact. Figures in the left columns use all students in the sample as the denominator. Figures in the right columns use only the students that experienced that issue (e.g. students who used cannabis, reported a problem or challenge with finances, or experienced a particular health issue) in the denominator.
(items are listed in the order in which they appear in the survey)

| Percent (\%) | Negatively impacted academic performance among all students in the sample |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Cis Men | Cis Women | Trans/ Gender Nonconforming | Total |
| Alcohol use | 3.0 | 2.7 | 0.0 | 2.9 |
| Cannabis/marijuana use | 0.0 | 1.3 | 0.0 | 1.0 |
| Problems or challenges in the last 12 months |  |  |  |  |
| Career | 9.1 | 15.0 | 46.2 | 14.8 |
| Finances | 18.2 | 23.5 | 23.1 | 21.9 |

## E. Violence, Abusive Relationships, and Personal Safety

Within the last 12 months, college students reported experiencing:

| Percent (\%) | Cis Men | Cis Women | Gender Nonconforming | Total |
| :---: | :---: | :---: | :---: | :---: |
| A physical fight | 1.5 | 2.7 | 7.7 | 2.6 |
| A physical assault (not sexual assault) | 1.5 | 3.1 | 7.7 | 3.2 |
| A verbal threat | 10.6 | 14.6 | 30.8 | 14.6 |
| Sexual touching without their consent | 1.5 | 8.0 | 7.7 | 6.5 |
| Sexual penetration attempt without their consent | 0.0 | 2.7 | 7.7 | 2.6 |
| Sexual penetration without their consent | 0.0 | 2.7 | 7.7 | 2.3 |
| Being a victim of stalking | 0.0 | 8.0 | 15.4 | 6.8 |
| A partner called me names, insulted me, or put me down to make me feel bad | 4.5 | 12.8 | 7.7 | 11.0 |
| A partner often insisted on knowing who I was with and where I was or tried to limit my contact with family or friends | 0.0 | 6.2 | 0.0 | 4.5 |
| A partner pushed, grabbed, shoved, slapped, kicked, bit, choked or hit me without my consent | 1.5 | 3.1 | 0.0 | 2.9 |
| A partner forced me into unwanted sexual contact by holding me down or hurting me in some way | 0.0 | 2.2 | 0.0 | 1.9 |
| A partner pressured me into unwanted sexual contact by threatening me, coercing me, or using alcohol or other drugs | 1.5 | 2.7 | 7.7 | 2.6 |

College students reported feelingvery safe:

| , | Percent (\%) | Cis Men | Cis Women | Trans/ Gender Nonconforming | Total |
| :---: | :---: | :---: | :---: | :---: | :---: |
| On their campus (daytime) |  | 63.6 | 57.5 | 38.5 | 57.6 |
| On their campus (nighttime) |  | 25.8 | 7.1 | 7.7 | 11.0 |
| In the community surrounding their campus (daytime) |  | 30.3 | 23.9 | 0.0 | 23.9 |
| In the community surrounding their campus (nighttime) |  | 10.6 | 3.5 | 0.0 | 4.9 |

## F. Tobacco, Alcohol, and Other Drug Use

| Percent (\%) | Ever Used |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Cis Men | Cis Women | Trans/ Gender Nonconforming | Total |
| Tobacco or nicotine delivery products (cigarettes, ecigarettes, Juul or other vape products, water pipe or hookah, chewing tobacco, cigars, etc.) | 31.8 | 29.2 | 15.4 | 28.8 |
| Alcoholic beverages (beer, wine, liquor, etc.) | 57.6 | 75.8 | 69.2 | 71.2 |
| Cannabis (marijuana, weed, hash, edibles, vaped cannabis, etc.) [Please report nonmedical use only.] | 37.9 | 39.4 | 61.5 | 39.8 |
| Cocaine (coke, crack, etc.) | 1.5 | 4.9 | 0.0 | 3.9 |
| Prescription stimulants (Ritalin, Concerta, Dexedrine, Adderall, diet pills, etc.) [Please report nonmedical use only.] | 9.1 | 7.5 | 7.7 | 7.8 |
| Methamphetamine (speed, crystal meth, ice, etc.) | 0.0 | 0.4 | 7.7 | 1.0 |
| Inhalants (poppers, nitrous, glue, gas, paint thinner, etc.) | 1.5 | 2.2 | 7.7 | 2.6 |
| Sedatives or Sleeping Pills (Valium, Ativan, Xanax, Klonopin, Librium, Rohypnol, GHB, etc.) [Please report nonmedical use only.] | 6.2 | 5.3 | 7.7 | 5.5 |
| Hallucinogens (Ecstasy, MDMA, Molly, LSD, acid, mushrooms, PCP, Special K, etc.) | 13.8 | 8.4 | 0.0 | 9.1 |
| Heroin | 0.0 | 0.0 | 0.0 | 0.3 |
| Prescription opioids (morphine, codeine, fentanyl, oxycodone [OxyContin, Percocet], hydrocodone [Vicodin], methadone, buprenorphine [Suboxone], etc.) [Please report nonmedical use only.] | 4.5 | 2.7 | 0.0 | 2.9 |

*These figures use all students in the sample as the denominator, rather than just those students who reported lifetime use.

## Substance Specific Involvement Scores (SSIS) from the ASSIST

| *Used in the last 3 months |  |  |  |

| 16.7 | 9.3 | 7.7 | 10.7 |

## Driving under the influence

■ $14.1 \%$ of college students reported driving after havingany alcohol in the last 30 days.*
*Only students who reported driving in the last 30 days and drinking alcohol in the last 30 days were asked this question.

- $35.8 \%$ of college students reported driving within 6 hours of using cannabis/marijuana in the last 30 days.*
*Only students who reported driving in the last 30 days and using cannabis in the last 30 days were asked this question.

Estimated Blood Alcohol Concentration (or eBAC) of college students. Due to the improbability of a student surviving a drinking episode resulting in an extremel. high eBAC, all students with an eBAC of 0.50 or higher are also omitted from these eBAC figures. eBAC is an estimated figure based on the reported number of drinks consumed during the last time they drank alcohol in a social setting, their approximate time of consumption, sex, weight, and the average rate of ethanol metabolism. Only students who reported drinking alcohol within the last 3 months answered these questions.

| Estimated BAC | Percent (\%) | Cis Men | Cis Women | $\begin{array}{\|c\|} \hline \text { Trans/ } \\ \text { Gender Non- } \\ \text { conforming } \\ \hline \end{array}$ | Total |

## J. Ongoing or Chronic Conditions

| Cis Men $\mathrm{n}=$ | 66 |
| ---: | ---: | ---: |
| Cis Women $\mathrm{n}=$ | 226 |
| Trans/GNC $\mathrm{n}=$ | 13 |

The questions for the ongoing or chronic conditions are presented differently in this report than the order they appear in the survey. In the survey, all items appear ir a single list, ordered alphabetically. In this report, the conditions are presented in groups to ease burden on the reader. The findings are divided into mental health conditions, STIs and other chronic infections, and other ongoing or chronic conditions in this report.

| Mental Health <br>  | College students reported ever being diagnosed with the following: |  |  |  | *Of those ever diagnosed, those reporting contact with healthcare or MH professional within last 12 months |  |  |  |
