CIS student clubs

Faculty Advisor: Michael O'Leary
Promote cybersecurity awareness and better prepare Towson University students for a career in technology. We are actively preparing for the Collegiate Cyber Defense Competition in February.

Faculty Advisor: Cheryl Brown
The iTECH club encourages learning and awareness of technology and its real world application to aide all that are interested in technology, especially CIS majors. Come join us to strategically position yourself for a brighter future.

Faculty Advisor: Michael McGuire
The Data Science Club is focused on educating students on various data–related technologies. This includes Data Visualization, Machine Learning, Artificial Intelligence, and Data Science. We are for all skill levels and our goal is to introduce students to a new and exciting field in the tech industry.

Faculty Advisor: Josh Dehlinger
The Software Engineering Club is here to help the next generation of Software Engineers and Developers refine their skills and prepare for an exciting career in software. We host workshops, events, and panels throughout the year!

Faculty Advisor: Blair Taylor
Bringing women in tech (and those supportive) together in a welcoming environment to share experiences, learn from each other and other resources, and participate in fun/engaging activities.
