

MEDIEVAL SCIENCE: EXPLORING INSIGHTS AND DISCOVERIES

This course provides a comprehensive exploration of medieval scientific thought, encompassing various disciplines such as medicine, astronomy, and geography. We will delve into the groundbreaking insights and theories proposed by influential figures like Alhazen and Hildegard of Bingen. Through in-depth analysis and interactive discussions, we will uncover the complex network of scientific inquiry that defined the medieval era. This journey into medieval science promises intellectual enrichment. Additionally, it offers a unique opportunity to engage with historical methodologies and scientific concepts, fostering a deeper understanding of the medieval worldview. Join this enlightening exploration, as we discover the wonders of medieval science.
