Wanna get involved?
CIS Student Clubs

Sister Scripters

Serves as a safe space and community to amplify black women in tech's voices. Offers support and resources for members to achieve their personal, professional, and educational goals.

Cyber Defense Club

Promotes cybersecurity awareness, better prepare students for a career in technology, and actively prepares for the Collegiate Cyber Defense Competition.

Bit Brothers

A sub organization of Sister Scripters, their mission is to create a community to support African-American men in tech to succed personally, professionally, and academically.

Faculty Contact: Dr. Willie Sanders

Software Engineering Club

Helps the next generation of Software Engineers/Developers refine their skills and prepare for a career in software through workshops, events, and panels.

iTech

Encourages learning and awareness of technology and its real world application to aide all members towards a brighter future.

Game Design Club

Members will be able to understand the game design process by building games first-hand. This club is a great way to build a resume for video game design, music composition or graphic design.

Robotics Club

Combines programming and engineering skills to design, build, and program robots for VEX robotics competitions, gaining hands-on experience in problem-solving and machine development.
