The posters argue for the empowerment of women, achievement of equality between women and men, and the elimination of discrimination against women and girls.

Wave 11222

7:00 p.m., Dryer MFA Lab, [Center for the Arts](#)

Wave 11222 utilizes narrative storytelling through solo performance as a method to highlight individual stories within the larger cultural context of the COVID-19 pandemic. Drawing from long-form interview data collected in Spring 2024, Wave 11222 blends the narratives of grief activists who have lost loved ones to COVID-19, autoethnography, and theoretically informed cultural critique to respond to the question: How does activism and coalitionality emerge from death and mourning? As a solo performance project, Wave 11222 is an accessible entry point for an audience to openly engage conversations about death, dying, and the lasting impacts of the COVID-19 pandemic especially within poor, working-class, and other marginalized communities. Engaging cultural memory and public accountability through the stories of the participants and the performer, Wave 11222 makes it clear that not only is the pandemic not over, but we must be accountable for the rippling repercussions of the damage done. Through these stories we not only keep their memories alive but begin to develop a deeper understanding of the depth of grief from COVID-19.
